THEC64 Update 23rd March 2018

In anticipation of you all receiving your THEC64 mini consoles in the coming few days, we thought you might like to see this short 'An introduction to THEC64 Mini' video we have created, which explains the basic features you will find on the console.

<https://youtu.be/hOyqOD2MleI>

In the next few days our website will be updated with full online manuals, external file loading instructions and help, details on potential future features, FAQ's, the existing forum, etc. and also later next week, the first of many planned firmware updates for you to download and be able to update your consoles with on an ongoing basis. We hope this will be a regular occurrence, as we create all new ways for you to be able to use functions on your THEC64 mini!

So, with literally just hours to go before the first of you receive your THEC64 mini consoles, we wanted once more to thank you all for your support, and for joining us on what has been an incredible journey already, and in some ways has just begun!
