Connecting a C64 to WiFi

<https://www.youtube.com/watch?v=fX3k6EZsZCM>

Nostalgia Nerd

Published on Sep 7, 2018

Welcome to the world of WiFi, to be specific, C64 WiFi. Yes, thanks to a fangled gadget, we can connect a humble 8 bit micro to the modern world of WiFi. What's more, we can surf the internet once we're there, or at least, the best substitute for the internet... BULLETIN BOARDS. So join me, as we go surfing through some Commodore 64 Bulletin Boards.

If you haven't already, please do take a moment to check out Andrew at The Back Office Show: <https://www.youtube.com/user/ajarmstr>

Watch the FULL Commodore & Atari Fight BBS Movie at <https://youtu.be/-Sy7-L3r9f0>

Thanks to Tim Harris at Shareware Plus for sending me the WiFi64. Visit his eBay featuring all sorts of goodies at <https://nnerd.es/2MXYY8W> or check out

Amiga – C64 to USB Joystick adapter

<https://www.arananet.net/pedidos/product/amiga-c64-to-usb-joystick-adapter/>

Description

This little board allows to connect your retro DB9 amiga / C64 joystick device and use it on your favorite emulator.

Specs:

Does not require any driver (is detected by windows as a game controller).

Supports autofire (if your joysticks allow it).

Works from Win XP to Win10 and also Linux, MacOSX and Morph OS.

Just plug and play :). Cost: 15,00€
